

Finance Manager for a Scale-up Software Company

On behalf of Agillic, a public traded growing technology and software company inlisted on Nasdaq *First North* Growth Market, are we looking for a Finance Manager. Agillic is a Danish software company that specializes in marketing automation and customer relationship management (CRM) solutions.

Agillic's Finance Manager plays a vital role in the business, as this position has the overall responsibility for financial reporting, financial analysis and financial presentations to the Management. The main purpose of the role is to secure a structure of reporting tools to deliver accurate and timely financial information. The Finance Manager shall also drive and improve financial governance such as procedures, system automation, accounting, controlling and financial reporting. This will also require experience in stakeholder management as some of the data will come from other departments.

KEY RESPONSIBILITIES

- Monthly reporting to Management on financial figures, SaaS matrix and KPI's
- Deliver presentations to Management based on proper financial analysis
- Yearly preparation of company's annual report
- Responsible for the statutory and interim audit
- Budgeting and forecasting
- Responsible for salaries within the company's headquarters
- Develop operational improvement and digital automation
- Contribute to ongoing review and adjustment of procedures and processes.

IDEAL EXPERIENCE

- experience as an auditor (with international clients)
- experience as Finance Manager, Financial or Group controller or similar where you have gained hands-on insight on all the financial assignments.
- Relevant academic education on BA or Master level.
- Extensive hands-on experience with financial reporting
- Deep knowledge of Danish accounting principle preferable IFRS as well as tax legislation
- Strong stakeholder management capabilities and experience with multiple partners
- Experience from a complex environment with constant changes
- Hands-on experience and a high general IT user level

DESIRED ATTRIBUTES

- Strong financial and analytical skills with the ability to manage large sets of data and present results in a simple clear manner
- Driving and improvement mindset combined with a track record ability to coordinate and drive processes whilst remaining humble and true to Agillic's values
- Solid business understanding
- Entrepreneurial and ambitious by nature and works well in a highly dynamic and transformational environment
- Attentive to details, solution oriented, structured and good to plan and prioritize
- Can-do attitude and strong problem-solving skills
- Ambitious, high-energy, personable, collaborative

ABOUT AGILLIC

Agillic is a Danish software company that specializes in marketing automation and customer relationship management (CRM) solutions. The company offers a platform that enables businesses to orchestrate and personalize their communication with customers across multiple channels, including email, SMS, social media, and more. Agillic's platform allows marketers to create, automate, and manage various marketing campaigns, including targeted messaging, customer segmentation, and behavioral analysis. It emphasizes personalized communication to engage customers effectively and improve overall marketing performance.

The software integrates customer data from various sources, enabling companies to create tailored marketing strategies based on customer preferences, behaviors, and interactions. This personalized approach helps businesses enhance customer engagement, increase retention rates, and drive better results in their marketing efforts. Agillic's goal is to provide businesses with the tools necessary to deliver relevant and timely messages to their customers, ultimately improving customer satisfaction and driving revenue growth.

Agillic's purpose is to help companies build and reinforce sustainable relationships based on unique customer experiences. We use the power of data, content, and our platform's personalisation capabilities to eliminate communication pollution and thereby optimize the experience for the individual.
